MINING, BUSINESS AND STOCKS

DULL MARKET FOR MINE STOCKS

New York Benanza and May Day Still Inclined to Go Down ward.

CARISA FINDS SOME TAKERS.

Con. Mercur Remained Firm-Bidding For Boston Con,--- Closing Quotations and Sales.

Testerday's market for mining stocks was bad, but it was worse today, Both May Day and New York went lower and neither offered much encouragement at the close, when many predicted that the bottom had not been reached. Carisa found takers at 16 and 161/2 cents. Daly went at \$2.40, while a few bunches of Sacramento were called into the pit at 7% and 8 cents a share. A bid of 32 cents for Lower Mammoth brought it to the front, while Silver Shield was loosened at 35 cents. For Mammoth \$1.02* was bid, but \$1.09 was the lowest price asked for it. idoston Consolidated was wanted at \$8.22*, but could not be had at the price. Beck Tunnel, offered at 10 cents, received no

response.

The closing quotations and sales were posted as follows:

RECAPITULATION.

A. S. CAMPBELL. Stock Broker, 216 D. F. Walker Block.

SALT LAKER STRIKES IT. B. J. Waugh Interested in a New Find at

Gold Center.

According to the Bullfrog Miner, Ernest J. Waugh, formerly a clerk in the office of Prof. W. H. Tibbals in this city, and who gave up his job to seek a fortune in the Nevada gold camps, is meeting with success. The Miner says:

"E. J. Waugh, James Gillis and others have made a great strike five miles east of Gold Center. They have uncovered a large body of flourine and phonolyte which assays from \$10 to \$40. The ledge is said to be 200 freet wide. The ledge is said to be 200 feet wide and lies at the base of Bare moun-tain. A living spring above the claims furnishes ample water. This great find is in Beatty district.

bodies and may be even more valuable, Development of the Shasta, May Blossom, McClure, Ydalpom, Arps, Grahams, Brushy Canyon, California Copper, Collins, Tamarack, Sanders, Horse Mountain Little Bully Hill and others may easily disclose a combined value three times as great as that of Bully Hill. Three times \$2,500,000 is \$7,500,000; to which add \$2,500,000 for Bully Hill, and the total is \$10,000,000 the approximate value of the camp in the near future. bodies and may be even more valuable

OLD DYER MINE.

Evanston Advices Say a New Four-Foot Vein of Copper Ore Has Been Opened.

Evanston, Wyo., May, 10.—The owners of the old Dyer mine between Carter, Wyo., and Vernal, Utah, have opened up a four-feet vein of high grade copper ore. The fine has stimulated prospecting in that vicinity.

FEDERATION OF MINERS. President Moyer and Other Officials Arrive for Convention.

Although the convention of the Western Federation of Miners, which is scheduled to take place in this city. does not open until a week from next Monday, President Charles Moyer of Denver and several members of the executive board have arrived. They came in last night and have taken rooms at the Wilson hotel. The mem-

rooms at the Wilson hotel. The members of the board are: James A. Baker of British Columbia: Charles Mahoney of Butte, Mont.; Marion Moore of McCabe; Ariz.: J. A. Simpkins of Wardner, Ida.; James Kerwin of Terry, S. D.; Frank Smelzer of Denver, Colo., and J. C. Williams, the vice president from Grass Valley, Colo.

Tomorrow morning the board will meet at Federation hall for the purpose of auditing the books of the secretary and treasurer of the organization. This work, involving as it does a great amount of labor, inasmuch as there are branches of the federation all over the United States, will not be concluded for a week or 10 days, and during that time

United States, will not be concluded for a week or 10 days, and during that time there will be little or nothing of public interest to give out.

The coming meeting of the federation will be important for there are a number of matters affecting the welfare of the miner to be brought up for consideration. The orders recently promulgated by Samuel Gompers, president of the American Federation of Labor, in which he instructed the labor organizations of the country to cease contributing money to the Federation of Miners, will receive attention. uting money to the Feder ers, will receive attention. The sessions of the forthcoming con-vention will be held in Odd Fellows'

PROSPECTING IRON FIELDS. District Near Rawlins, Wyo., Soon to be

Special Correspondence.

Rawlins, Wyo., May 8.—Drilling ma-chinery has been received here, and porings will be commenced in the iron fields close to town to determine the character and extent of the iron and copper deposits. Connecticut capital is behind the enterprise, which is in charge of local minesr.

YAMPA SMELTER.

Remodeled Furnace Went Into Commission Today.

The copper furnace at the Yampa smelter in Blugham, which is known as furnace No. 1, and which has been undergoing some important changes in or-der to make it an exact counterpart of furnace No. 1, went into commission tos

day.

Manager Keiley anticipates

Manager Keiley anticipates changes will prove very beneficial; not only enabling the treatment of a larger tonnage than has been possible hereto-fore, but accomplishing equally as good results as being obtained with the No. 2

Routt County Placers.

Special Correspondence. Rawlins, Wyo., May 8.-P. P. Lyon has arrived here and is outfitting to go to the Routt county gold placer dig-gings in Colorado. Lyon's company owns about 40 claims south of Baggs, Wyo., and he believes they have a rich proposition. Heavy machinery will be installed at once.

STRANGE BOOSTS NEVADA CAMPS

Well Known Mining Engineer Sees a Bright Future for the Bullfreg District

SAW D. H. PEERY'S PROPERTY.

And Speaks Well of it-Looks to See Both Tonopab and Goldfield Forge Ahead.

V. P. Strange, who returned from Goldfiel da few days ago to give his attention to local business matters, is very much impressed with the Bullfrog district and predicts a great future for "I am satisfied," said he, "that there will be some very good mines opened in the Bullfrog district. While there has been some very rich ore found there, I believe it is going to make a'big milling camp. In this respect the district is fortunately located; there being an abundance of water available for milling purposes.

"Yes, I have seen the Montgomery Mountain property now being developed by the D. H. Peery syndicate, and my judgment is, that Mr. Peery has secured a very good property and that he will make a big let of money out of

Tonopah, Mr. Strange says, is a very active place, and inasmuch as the de-velopment of the mines there has been carried to the extent to assure their permanency, there is not the slightest doubt but that the camp is going to grow into greater importance. He congrow into greater importance. He considers Tonopah investments good at the present time. While Mr. Strango has a good word to say for other camps, he at the same time "boosts" for Goldfield, which he looks upon as being one of the greatest mining camps the country has ever produced. There are over 7,000 people in Goldfield at the present time, and as the mines are developed and opened to production. the present time, and as the mines are developed and opened to production, the population will increase. Although only a little more than a year old, Goldfield is the largest mining town in Nevada. Work on the new railroad is going forward steadily, and it will not be many months until trains will be operated into the come. operated into the camp.

NEW CENTURY STRIKE.

Manager Madsen Reports Ore Found in Middle Tunnel.

Manager P. W. Madsen of the Cen-tury Gold Mining company, with prop-erties in the Park Valley mining district, has returned from camp with the information that what appears to be a good vein of ore, has been opened in the new, or what is known as the Mid-dle tunnel. The strike was made at a distance of 140 feet in. The ledge will be developed and Mr. Madsen is confident it will prove to be an important source of ore supply in the future. The mill is still out of commission, and probably will be for some time.

SILVER SHIELD-CARISA. Manager Joseph Tells What is Going or

At Those Mines. Harry S. Joseph returned from a round-up of the Silver Shield and Ca-risa properties, of which he is manager, this morning. He reports conditions this morning. He reports conditions satisfactory at both properties. At the former a double-set raise has been started for the purpose of shaping the ore bodies above the tunnel for economic extraction. The water is less troublesome, Mr. Joseph says, than it was sometime ago.

At the Carisa mine a vigorous cam-paign is being conducted. The shaft is to be drepped down to what is to be the 1,000-foot station. A station is now being cut on the 900, preparatory to carrying out this plan. On the 700, a raise is to be made, after the drift is carried forward about 20 feet, to connect with the ore bodise blocked out above.

THE UTAH COPPER.

Manager Jackling Will Choose Chief Mechanical Engineer.

There are said to be several competiters for the position of chief mechanica lengineer for the Utah Copper company, who is to have charge of the construction of the proposed 6,000 concentrating mill, to go up near the south end of the Great Salt Lake. as well as the enlargement of the present milling plant in lower Bingham canyon; also, the railroad which is to be constructed to connect the mines

with the mills.

Manager Jackling informed a representative of the "News" during the day that a selection would probably be made late this afternoon. The appointee will be given instruc-tions to proceed with the drawing of the plans for the big plant as soon as his forces can be thoroughly organized for the work.

CONCENTRATES.

and few will believe there is anything real about it until something substan-tial is shown. There are some people from Missouri in this camp.—Builfrog Miner.

The above mine, an extension to the Montgomery-Shoshone, is being incorporated, and development work is progressing as rapidly as possible. The tunnel has struck the same quality of shipping ore that has made the Montgomery-Shoshone famous. The tunnels of the two mines are 700 feet apart, working in the same ore body, showing that an immense deposit exists.—Bullifog Miner.

The Metal Mountain Mining company is the latest mining venture undertaken in this city. The company has a capi-tal stock of 1,000,000 shares, of the par value of \$1 each. The property of the company is located near Reno, Nevada. The officers of the company are S. B. Wood, president; F. B. Huffman, vice president; O. K. Lewis, secretary and treasurer, who with J. T. Andrus and Fred Eberhardt form the board of discreters.

Dr. U. V. Withee, who owns the mountain bounding Beatty on the east, has arrived from Ogden. He was accompanied by A. W. Mansur of Boston and J. C. Lynch. Dr. Withee informs the Miner that his company will immediately but men to work developing the distely put men to work developing the mines in the famous mountain that bears his name. The entire territory is highly mineralized and some great ledges are said to exist in the claims of the Kawich Bullfrog Mines company, in Beatty district.—Bullfrog Miner.

Joseph M. Hart, the freighter to Bullfrog, hauis loads that are whoopers, with 12 horses he loaded 13½ tons, consisting of furniture, lumber, groceries, coal, stoves and trunks. In addition, he carried 3,500 pounds of hay and 2,300 pounds of grain. This is equal to one and one-half ton haul to the horse from Vegan to Bullfrog—an evidence that the route from Vegas to the great gold camp is a good grade and just such a course as a railroad line will seek for connection at Vegas.-Las Vegas Times.

The first automobiles designed to run between Las Vegas and the mining run between Las Vegas and the mining centers of the Builfrog district arrived here this week. They are owned by the Builfrog Transportation company—Dr. D. T. Bentley, president; Charles E. Denig, secretary and treasurer, and T. B. Cramer, manager. This company will put six cars on the road between here and Beatty, and three between Beatty and Goldfield. There will be a daily service at Las Vegas to and from Beatty. A preliminary trip was begun this morning.—Las Vegas Age.

Mr. B. F. Miller, of the Utah & Nevada Stage company, has had 10 men employed during the past month making a cut off in the Beatty-Vegas line which reduces the distance to 100 miles. The first begins nine miles south of Gold Center and cuts off 20 miles before reaching Indian Springs. The grade is less and cuts out heavy sand. Cold Springs water is found on the cut off at Cane Springs. Another cut of six miles is made from Indian Springs to Las Vegas. Thus the stage road will hereafter be 100 miles from Beatty to Las Vegas .-- Builfrog Miner,

The shaft on the Dixle has attained to a depth of 250 feet, where a station is being cut preparatory to extending drifts in both directions on the ledge. Since the repairs to the machinery, every thing is running smoothly and development is progressing rapidly. The ore shoot is to be extensively explored from the 250 stations, although this will from the 250 stations, although this will not interfere with the continuance of the shaft to a greater depth. Manager W. H. Clark reports that the mine is maintaining its splendid showing and, in fact, is looking better with every foot of development performed. The force at the mine is in the neighborhood of 30 men.—Goldfield News.

WESTERN MARKET LETTER.

Special Correspondence. Kansas City, Mo., May 8,-Very light cattle receipts last week helped the market in different ways, 15 to 20 cents

market in different ways, 1s to 20 cents was added to prices on nearly all kinds of cattle, and packers got rid of a part of the stuff in their coolers, leaving the situation considerably better than close of previous week. The supply today is larger than a week ago, but the market to the to stand a little more this week. larger than a week ago, but the market is able to stand a little more this week, and is about steady on desirable kinds, others weak to 10 cents lower, stockers and feeders steady. Country grades of cattle have held up better lately than killing cattle, as it looks like a better proposition this year than last, and demand from the country is very good. Prices of stockers and feeders are 40 to 60 cenis higher than at this time last year, whereas fat cattle are 75 cents to 60 censs higher than at this time last year, whereas fat cattle are 75 cents to \$1 higher than a year ago, A good many hay fed cattle from Colorado, Montana and Utah were here last week, weights from 900 pounds to 1,100 pounds, and sold at \$4.25 to \$4.75. Quite a number of high grade light weight Paphantle stockers were also included. a number of high grade light weight Panhandle stockers were also included, selling up to \$4.80. Hay fed steers suitable for the packers were scarce, but a few sold at \$4.65 to \$4.75. Corn fed branded steers sold at \$6.20 last week, the extreme top for the week. Unless excessive runs are received this week, the market should hold about steady, as the demand is able to ab-sorb ordinary supplies all right. Sheep and lambs finished last week about steady with close of previous week, after selling lower about the middle of the week. Run was not heavy, as most of the fed stuff has been marketed, and run from Texas and Arizona is only just started. Sup-ply today is liberal at 7,000 head, mar-ket steady and active. Six loads of Texas sold at \$4.75 for wethers and \$4.50 for ewes and wethers mixed, today. for ewes and wethers mixed, today. This made up the offerings from Texas. Choice fed Mexican lambs sold at \$6.85 today, which is about the limit on fed lambs. Choice clipped lambs sell at \$5.60 to \$5.80. Range on fed yearlings is from \$5.00 to \$6.00, wethers \$4.50 to \$5.50, ewes \$4.25 to \$5.25, these prices including both clipped and wooled stock. Large numbers of sheep and lambs are being held in good market so that until these are worked off prices will do well to hold their own.

UNIFORMLY UPWARD

Changes at Opening Were About Evenly Divided Between Gains and Losses.

BUSINESS ON A SMALL SCALE.

Rise in Southern Pacific Had Much to Do With Improvement in Railroad List.

New York, May 11 .- First prices made small changes from last night which were quite evenly divided between gains and losses. Business was on a very light scale. Canadian Pacific with a decline of 116 was the conspicuously weak stock while Southern Pacific and Northern Pacific made large fractional gains. Prices tended uniformly upwards after

the dealings were well under way, Southern Pacific was the feature, its rise of 11/2 having much to do with the improvement in the railroad list. Toward Il o'clock the market was easier.

The level of the market was almost immovable.

Bonds were steady at noon.

A buoyant outburst in the stocks connected with the Northern Securities company strengthened the market, but the speculative interest was of meager proportions outside the leaders. Great Northern prefered jumped 11½ and Northern Pacific 6½.

Pacific 64s.

General interest in the market diminished as the day progressed. Several stocks yielded 1, while Union Pacific and New York Central sold as much higher.

Weekly Crop and Weather Bulletin. United States department, Idaho sec-

United States department, Idaho section, climate and crop service, weather bureau. Weekly crop bulletin for the week ending Monday, May 8;

Boise, Ida.—During the first half of the week the temperature averaged considerably below the normal and copious rains occurred in all but the northern counties, with some snow in the mountains; the change to fair weather on the 5th was marked by the occurrence of frost in many localities, but very little damage is believed to have resulted. During the remainder of the week much higher temperatures prevailed, the 7th having been a very warm day over most of the state; high drying winds occurred in many sections, the wind on the 7th having been gusty and sufficiently high at times to cause some damage to trees and buildings; a return to showery weather occurred on return to showery weather occurred on

CROPS.

· Fruit-Fruit trees are coming into bloom in elevated localities, while in western valleys most of the crop is set; it seems probable that trees will not be so heavily laden as in 1904. so heavily laden as in 1994.

Grain—Rains were of great benefit to small grain already sown, but seriously delayed completion of seeding in elevated eastern districts; seeding is practically complete over the remainder of the state; cool weather has been favorable for stooling of spring grain; some rye is heading and in Ada county fall wheat is coming into the boot; there is some complaint of damage by cutworms in Oneida county.

Grass—Range grass is better than usual, and stock is gaining rapidly in thesh; the occurrence of timely rains gives assurance of an abundance of grass; hay crops need warmer weather in most sections, but in general promise good yields; irrigation of meadows

ise good yields; irrigation of meadows has been general in southwestern dis-Vegetables-Planting of sugar beets

is complete in some localities, while in others but little planting could be done owing to heavy rains; early planted beets are coming up to an excellent stand; the late potatoes and garden vegetables are being planted,

G. B. & J. H. Whitecar, Pattern-makers, Gears, Sprockets, Sheaves, Mill and smelter work a specialty. Estimates cheerfully given. 247 Reed St. Tel.
